

## How to Satisfy Your Business' "Need for Speed"

How much do you enjoy waiting? Probably not on your list of favorite things to do. Nobody likes waiting on slow data connections and temperamental phone lines. Not you, and definitely not your customers.

Slow connections hinder your business, gumming up the works in your well-oiled business machine. That's why it's important to keep your office cabling up to date.

### When you have the right cabling system, you:

- Get faster data speeds that make file sharing a breeze
- Enjoy crystal-clear interoffice phone quality
- Avoid growing pains as your business expands
- Access your cloud-based data more quickly than ever before
- Streamline and simplify future tech upgrades

Cox Communications and Electronics specializes in cabling and fiber optic infrastructure such as:

#### Copper

- CAT3, CAT5e, CAT6, and CAT6A
- Installation
- Termination
- Testing and Certification reports of CAT5e or higher, via Fluke Networks analyzer.
